

# MIRANDA

## NEW GENETIC HYBRID WITH AN OUTSTANDING YIELD

- **YIELD POTENTIAL**  
Over 5-6t/ha in our european R&D network
- **PHOMA TOLERANT**  
Very healthy for phoma (grp 1) and other diseases
- **HIGH AGRONOMIC VALUE**  
To secure yield from sowing to harvest

### Product id

<b>Flowering</b>	Mid early
<b>Maturity group</b>	mid early
<b>Oil type</b>	Classic

### Characteristics

<b>Plant height</b>	High
<b>TKW</b>	Medium
<b>Oil content</b>	41 - 43 %
<b>Glucosinolate content</b>	17 - 21µmoles/g
<b>Protein content</b>	34 - 37 %

### Agronomy

<b>Early vigor</b>	7
<b>Regrowth after winter</b>	
<b>Lodging</b>	8

### Disease tolerance

<b>Broomrape</b>	
<b>Phoma</b>	
<b>Sclerotinia (stem)</b>	9
<b>Verticillium</b>	8

### Growing recommendations

	Optimal conditions	Limited conditions
Adaptation	4	3
Density (Plant/ha)	30 - 35	25 - 30

MIRANDA is becoming a leader in its market segment. Yield results are impressive for 2 years and more and more farmers want to sow it. Perfect hybrid in field with potential over 3,5t/ha. MIRANDA is the key for your success.
