Growing recommendations

MAS 075B has a high level of global digestibility thanks a good level of dNDF and starch. Its good behaviour against diseases and its good stay green is essential to secure the quality of the silo. MAS 075B can be used in type of soil and is recommended for Biogas

	Optimal conditions	Limited conditions
Adaptation	4 on 4	4 on 4
Density - silage use	108000 Plants/ha	98000 Plants/ha

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
