## Growing recommendations

In the last two years of experiment, MAS 195P reached the top of the very early segment in terms of yield level, combined with a good feed quality. MAS 195P performs in every potential, but specially in average and low potential. Thanks to a promising new genetics, this hybrid is well adapted for a biogas use

	Optimal conditions	Limited conditions
<b>Adaptation</b>	3 on 4	4 on 4
<b>Density - silage use</b>	99500 Plants/ha	89500 Plants/ha

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
